EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Lee on 4/15/05.

2. The application has been amended as follows:

In claim 1, line 3, in the phrase "to the axis"; replace "the" with - -an- -

In claim 1, line 8, in the phrase "number of the gas"; delete "the"

In claim 1, last line; insert - -generated by the sample- - after "analyze the gas"

In claim 9, line 4, in the phrase "to the axis"; replace "the" with - -an- -

In claim 9, line 5, in the phrase "number of the gas"; delete "the"

In claim 9, line 10; replace "x-rays" with - -X-rays- -

In claim 10, line 4; insert - -generated by the sample- - after "analyze the gas"

In claim 11, line 4, in the phrase "number of the gas"; delete "the"

Reasons for Allowance

3. Claims 1, 3, 5, 6, and 8-11 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, prior art does not disclose or fairly suggest an analyzing apparatus including sample-holding means for holding a sample at a position which is common to a small-angle X-ray scattering device and a mass spectrometer, wherein the sample-holding means is connected to provide gas generated by a sample to the mass spectrometer using a carrier gas, and control means for controlling the small-angle X-ray scattering device and the mass spectrometer, causing the same to detect the X-rays and analyze the gas generated by the sample at the same time, in combination with all the limitations in the claim. Claims 3, 5, 6, 8, and 10 are allowed by virtue of their dependency.

Regarding claim 9, prior art does not disclose or fairly suggest an analyzing method including the steps of placing a sample at a position which is common to a small-angle X-ray scattering device and a mass spectrometer, providing gas generated by the sample to the mass spectrometer using a carrier gas, and analyzing the gas generated by the sample at the same time the X-ray is measured, in combination with all the limitations in the claim.

Regarding claim 11, prior art does not disclose or fairly suggest an apparatus including pressing means that presses shield members onto an annular member, in combination with all the limitations in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
